Any lines of customers (inside and/or outside)? None _____ If yes, what are the general ages of the customers?

Any signs about Mallinckrodt products? None _____ If yes, what do they say?

Other observations: Brooks Pharmacy was located in a medical building containing approximately twenty doctors as well as the Bonita Community Health Center that provides urgent and general health care. The pharmacy is located on the first floor to the right of the front door. To the immediate left of the pharmacy was a hallway that stated it

was a "Pain Management Area." The pharmacy was very small and there were no customers inside during my visit. All of the patients that were in and out of the building when I was present were elderly, no younger patients. When I was taking notes in my vehicle, a jeep with large tires drove next to my vehicle on the passenger side. The driver did not exit his vehicle, but looked down into my vehicle to see what I was doing. When I looked at him, I determined he was late thirties, white male, goatee and sunglasses. When I had looked at him for approximately one minute, he did not speak but backed out and drove out of the parking area. Based on my experience, I believe he was very possibly an investigator, DEA or Task Force. Lastly, based on the age of the people entering and leaving the building there was no way to determine if there were any issues with the prescriptions being filled.
